

Sales & Operations Planning:

We provide total solutions to put your operations back on track

Key Concepts:

The Objectives of the Sales and Operations process is to:

Monitor sales, procurement and inventory investment to plan and Customer service levels to agreed targets.

Develop a single forecast for each area to meet the requirements of Sales, Marketing and Finance.

Develop a procurement plan to meet forecast.

Set and agree inventory investment levels for each product group.

Manage projected out of stocks

Provide an interface between new product development and ongoing operations.

Agree on action for slow moving and obsolete stocks.
